FlexForm Chair

Model #MFF-200

Overview

Revolutionary seating solution engineered for today's educational and institutional environments. Combining security, mobility, and comfort in one sleek, modern design, this innovative chair redefines what it means to sit safely.

Crafted with a built-in bullet-resistant panel and discreet security-enhancing features, Chair offers peace of mind without sacrificing style or functionality. Its ergonomic structure promotes proper posture and all-day comfort, while its contemporary aesthetic complements any learning or professional space.

Materials

FlexForm School Chair features a durable polypropylene shell seat with a unique double-walled back construction, incorporating front and back layers (1/4" each) with an integrated UHMWPE protective panel (3/8" thick for NIJ Level IIIA ballistic protection, upgradable to Level III). Built on a sturdy 1" x 14-gauge chrome-plated steel frame with 2" swivel casters, the chair combines mobility with stability through its metal-to-metal riveted connections and strategic caster placement. Ergonomically sculpted to promote proper posture with an integrated handle for easy movement, this compact design supports flexible arrangements while prioritizing both student safety and classroom versatility.
